

MATCHUP Project

STUDY TOUR

27th June 2019
Valencia · SPAIN

This study is a training plan based on the exchange of experiences between cities. The **objectives** are to develop the capacities of urban planners so that they can fulfill their obligations correctly applying the logic based on sustainability, the environment and social needs, and can achieve the objectives that, as a city, have been established in this period of time Energy transition.

For this, we will show **the most successful experiences of the city of Valencia** around these issues. For the **mobility area**, you will visit the **Traffic Management** room. Secondly, the municipal managers of the area of **citizen participation** will tell them the **Participatory Budget Project "Decidim València"**. Later, the functionalities of the **App Valencia** will be explained. Next, the actions and projects developed in the field of **energy** will be shown: the **50/50 program**, the actions to fight against energy poverty and the **Municipal Energy Office**.
